S9922MC-LTE Industrial Router

RICON S9922MC-LTE Router, by Ricon Mobile Inc. industrial grade quality, designed and manufactured in accordance with 3G/LTE cellular network technology. With the embedded cellular module, it is widely used in many cases such as ATM connection, remote office security connection, data collection etc.

Ricon Mobile S9922MC router provides maximum service to customers while Zero Touch-SMS installation minimizes the need for field service with easy and automatic product installation service. S9922MC Router, Single Module Single SIM hardware type. The best throughput value of the S9922MC Router is 250 Mbps. The unique feature of the S9922MC Router is that it is online and redundant over the network between WAN, WLAN, 3G/LTE network. This feature allows the S9922MC to provide maximum network availability and reduce the likelihood of network failure to prevent losses due to network failures.

Mobile S9922MC routers are web-based and easily routed through CLI. In addition, the Ricon Management System Controller (RMSC) successfully accomplishes the goal of reducing the maintenance costs with the ability to access all the Ricon products in the network and to access instant and statistical data on the web environment and manage them 100%.
