S9930-LTE HyperNET 4.5G Router

The **RICON S9930-LTE HyperNET Router** is designed and manufactured by Ricon Mobile Inc. in accordance with the infrastructure based on LTE cellular network technology in home or SME class quality. With embedded cellular CAT4 Ricon Mobile module, it is widely used in many situations such as ATM connection, remote office security, connection, data collection, internet access etc. Supports traditional router functions such as VPN, firewall, NAT, SNMP, DHCP. The S9930-LTE supports LTE as a WAN interface, providing 300Mbps download and 150Mbps upload WAN bandwidth and 150Mbps Wi-Fi bandwidth. S9930-LTE Router supports single module + single SIM hardware. The definable route table enables customers to allocate bandwidth by business type and reduce network delays.
