RICON Mobile provides hardware (3G/4.5G routers) and software (RMS Ricon Management System) for wireless vending machines for retail.

Demand for vending terminals in many retail business sectors is growing. Different from staff service self-service vending machines can provide 24/7 service to your customers, to satisfy their demands every day and hour. Wireless mobile network for data transfer from machines is getting more and more popular. Why is that? Using mobile wireless network for data connectivity gives you freedom to change your vending machines locations any time it is needed. Mobile wireless network is also cost effective in case there is no landline available in the location you would like to put your vending machine. No expensive investment in wire network infrastructure is needed then. The cellular signal coverage is all you need.

Key requirements for modern vending machines installations are: security, stability, reliability. RICON wireless networking solution combines all of those requirements and provides reliable, flexible and cost effective wireless networking solutions for retail sector. With the help of RICON solutions you can put your vending terminals anywhere you want without astronomical investment in wireline network infrastructure. Furthermore RMS Ricon Management System, working together with RICON router as a part of the RICON solution; monitors connectivity on the mobile network, informs about network availability, signal strengths, etc., also controlling devices remotely.

CASE STUDY: wireless vending machines

RICON Mobile provides hardware (3G/4.5G routers) and software (RMS Ricon Management System) for wireless vending machines for retail.
Option 1: single module/ single SIM

- Vending machines
- RICON Router
- Data securely locked all the way in VPN tunnel
- Terminals Operating Data
- Router Operating Data
- MANAGEMENT CENTER/ DATA PROCESSING CENTER

Option 2: single module/ dual SIM

- Vending machines
- RICON Router
- Data securely locked all the way in VPN tunnel
- Terminals Operating Data
- Router Operating Data
- MANAGEMENT CENTER/ DATA PROCESSING CENTER

Option 3: dual module/ dual SIM

- Vending machines
- RICON Router
- Data securely locked all the way in VPN tunnel
- Terminals Operating Data
- Router Operating Data
- MANAGEMENT CENTER/ DATA PROCESSING CENTER

Some of the RMS Ricon Management System features include:

- Bi-directional installation by remote configuration.
- Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System.
- Centralized control for firmware upgrade available as a section of the RMS Ricon Management System. RMS Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System.
- Centralized control for configuration management and group based configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.

RICON routers and management platform major features are specially designed to meet multiply requirements of the secure wireless M2M projects:

- Dual SIM functionality enable seamlessly alternative between two networks when one of the network signal is poor or enable to switch upon desire to other network with flexible switching time.
- Dual GSM module enable persistent network connectivity with no break in time during the network switch.
- Guaranteed security and privacy in all the transactions: VPN support, GRE over IPSec, IPsec over PPTP/L2TP,
- Safety mechanism to avoid unintentional SIM cards manipulations,
- 4 x Ethernet 10/100M is available by default,
- NAT/PAT/Port forwarding dynamically and static options are available by default,
- Router supports DHCP Server, DHCP relay and other standard DHCP features by default,
- HTTPS/HTTP supports are available by default,
- Telnet and SSH accesses,
- SNMP agent,
- LTE/ HSUPA/HSDPA/UMTS/EDGE/GPRS Quadband support,
- RMA process for faulty routers,
- Configured via GUI and remotely via RMS Ricon Management System,
- Centralized control for firmware upgrade available as a section of the RMS Ricon Management System,
- Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System,
- Centralized control for the configuration management and group based configuration.
- For this specific project all the routers can be delivered with a project related pre-configuration.

RMS Ricon Management System centralizes access to all remote nodes, giving the user ultimate management control over the hardware. RMS Ricon Management System provides full control over data transfer and network diagnostics of thousands of routers and mobile devices on the network. Remote accessibility to the RMS Ricon Management System from any location gives the user fingertip control over multiple devices allowing the user to assess, diagnose, manage, control and resolve any problem within a very short period of time. Platform has a major impact on the cost of ownership, allowing redistribution of other valuable resources.

Some of the RMS Ricon Management System features include:

- Touchless installation by remote configuration,
- Device grouping,
- Batch remote configuration,
- Scheduled remote configuration,
- Scheduled remote firmware upgrade/downgrade,
- Multiple simultaneous terminal configuration updates,
- Setting customized SLA warning thresholds,
- SLA based live alarms,
- Live connectivity information,
- Live reports,
- Terminals detailed data stream info,
- Terminals detailed data stream reports for trend analyses,
- Terminals alarms reports for trend analyses,
- More information

RICON has experience and know-how which we would like to share with you.

Portfolio of RICON products and services enables to deploy secure and robust wireless network. Embracing connectivity using wireless 3G and 4.5G technologies our Customers benefit from reliable network even in the most remote, hazardous locations. RICON team cooperates closely with Customers to provide them with a most suitable application. RICON has experience and know-how which we would like to share with you.

RICON Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System, Centralized statistic collection to show router uptime, network attachment, signal strength and where possible latency and packet loss per device and per router group on RMS Ricon Management System.
RICON cellular - VPN - 3G/4.5G routers

Specifications
- Dual module/WAN/Wi-Fi multiple network mode backup
- WAN port support PPPoE, static IP, DHCP client.
- LCP/ICMP/flow/heartbeat check, ensure network usability
- SNMP network management, NTP support
- Local & remote firmware update
- Supports DNS proxy and Dynamic DNS (DDNS)
- Supports timing operation

Wi-Fi Characteristics
- Standard: IEEE 802.11b/g/n
- WEP, WPA and WPA2 encryption
- WPS key
- AP, Client, station, bridge mode support

Available Cellular Network
- LTE 800/900/1800/2100/2600MHz
- UMTS/HSPA+/900/2100MHz
- GSM/GPRS 900/1800/1900MHz
- HSPA+/HSUPA/HSDPA/UMTS 2100/1900/850/800MHz
- EDGE/GPRS/GSM 1900/1800/900/850MHz
- CDMA 2000/EVDO Rev.A 800MHz
- CDMA 2000/EVDO Rev.A 800/1900MHz

VPN
- IPSec
- PPTP/L2TP client
- GRE/IPIP

Interfaces
- 4×10/100Mb LAN interface
- 1×10/100Mb WAN interface
- 1× RS-232 console port (RJ45)
- 2× SMA-K antenna interface
- 2× Standard SIM/R-UIM interface
- 1× Standard DC power interface

Status LEDs
- System
- Power
- WLAN (Optional)
- WAN
- LAN (LAN1~LAN4)
- RF
- NET

Routing Protocols
- Static route
- RIPv2/OSPF dynamic route

Firewall & Filtering
- IP packet/Domain/MAC filter
- NAT
- DMZ

Ethernet Standard
- IEEE 802.3
- IEEE 802.3u

Device Management
- Local or remote web browser (IE v8 or above)
- CLI/Telnet command
- RMS Ricon Management System (optional)
- SSH config (optional)

Other
- 188mm x 121mm x 28mm
- Weight: 580g
- Temperature: -30°C~+70°C

Wi-Fi Characteristics
- System
- Power
- LAN (Optional)
- WAN
- LAN (LAN1~LAN4)
- RF
- NET

Firewall & Filtering
- IP packet/Domain/MAC filter
- NAT
- DMZ

Device Management
- Local or remote web browser (IE v8 or above)
- CLI/Telnet command
- RMS Ricon Management System (optional)
- SSH config (optional)

Other
- 188mm x 121mm x 28mm
- Weight: 580g
- Temperature: -30°C~+70°C

RMS Ricon Management System
provides full control of multiply 3G/4.5 routers for diagnostics and maintenance of all the mobile devices on the network.
